Citation

Bossard, L., Guillaumin, M. and Van Gool, L. Food-101: Mining Discriminative Components with Random Forests. ECCV 2014.

Contents

Food-101 has 101 food categories with 1,000 images each: 750 for training and 250 for testing.

The training images were deliberately left uncleaned, so some label noise is expected.

Use in MealSenseAI

Food-101 provides broad international coverage, but few Singapore hawker dishes, which is why FoodSG-233 is added.
