Employee Handbook

Larkspur Logistics · Aiko Tanaka · 08 January 2024

Welcome

Larkspur has grown to 84 people across Singapore, Kuala Lumpur and Ho Chi Minh City. This handbook explains how we work. Aiko Tanaka, Head of People, owns it and updates it every January.

How we work

We write things down. Decisions are recorded in a short memo with the options considered. Meetings without a written agenda can be declined.

Engineers spend one day each quarter on a customer site, because the people who build Wren should see it work.

Time off and learning

Everyone receives 21 days of annual leave and a learning budget of 1,500 US dollars a year. Parental leave is 16 weeks for all parents.

Safety on site

Anyone visiting a warehouse must complete the robot safety briefing first. If a Wren behaves unexpectedly, press the red stop button and report it in Harbor.
